# Scholastic Philosophy

RUDMIN

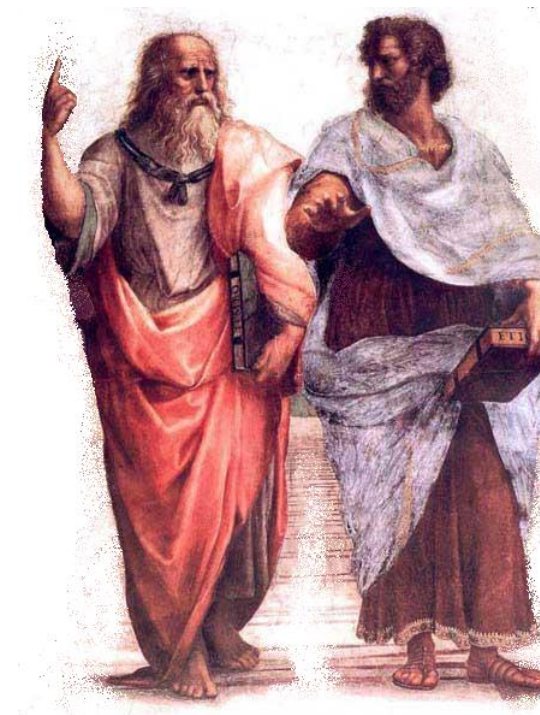

*Scholastic Philosophy* is a new kind of textbook for doing philosophy. Based on the classical philosophy of Aristotle and St. Thomas Aquinas, it presents human nature and creation, using over 250 analytical diagrams to construct a complete, dynamic, and integrated worldview that is rigorously systematic, universal, and Christian-friendly.

As the first in a two-volume series (the upcoming sequel being *Scholastic Theology*), it lays the foundations that can be continued later in such disciplines as Theology, Psychology, Law, and even Behavioral Biology and Physics. The textbook is intended for college students, seminarians, and advanced high-school students.
